Dallas, Texas | Phone: (316) 226-1954 | Mail: ishukannan0406@gmail.com | [LinkedIn](#)

SUMMARY

Software Engineer with 3+ years of experience designing and delivering scalable, high-performance frontend applications using React and TypeScript. Proven track record of improving UI performance, component reusability, and application stability for enterprise systems. Experienced working across the full UI lifecycle—from architecture and development to production support—in close collaboration with cross-functional teams.

SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, Redux, Next.js, HTML5, CSS3, Responsive Design
- **Backend:** Java, Spring Boot, Spring MVC, Hibernate, RESTful APIs, Node.js, Redis, Kafka, Microservices
- **Machine Learning & Data Analysis:** Python- Scikit-learn, Seaborn, Pandas, NumPy, Matplotlib, Tableau
- **Databases & DevOps:** PostgreSQL, MongoDB, SQL Server, AWS, Jenkins, Docker, Kubernetes
- **Testing & Tools:** JUnit, Jest, Git, Jira, Kibana

WORK EXPERIENCE

VERIZON | Software Development Engineer | Richardson, Texas

Jan 2026 - Present

- Migrated a large-scale Verizon Business e-commerce UI serving 100,000+ users from Angular to React, significantly improving frontend performance, scalability, and user experience.
- Designed and developed reusable React components and a structured Redux state management architecture to support complex checkout and product workflows.
- Diagnosed and resolved production UI defects by tracing issues across frontend state and backend API contracts, improving application stability in a distributed services environment.
- Collaborated closely with cross-functional teams (backend, QA, and product) in an Agile environment to deliver features on time.
- Integrated frontend components with backend REST APIs, handling authentication, product flows, and account-related transactions.
- Participated in code reviews, sprint planning, and production support, monitoring application health using Kibana.

ADROITTS | Software Engineer | Reston, Virginia

Jan 2024 - July 2025

- Built and maintained a responsive, enterprise-grade frontend using React, HTML, CSS, and JavaScript, integrated with a Node.js/Express REST backend.
- Led the design and development of a compliance dashboard, resulting in a **30%** increase in reporting efficiency.
- Developed comprehensive unit and integration tests using Jest and React Testing Library, improving release confidence.
- Optimized release cycles using Gitlab CI/CD, reducing downtime by **15%**, and managed source code repositories with Git.
- Migrated frontend applications from on-premises infrastructure to AWS, improving scalability and performance.
- Reduced unnecessary re-renders by optimizing Redux selectors, component updates, and minimizing state updates.

V3 TECH | Software Developer Intern | Dallas, Texas

Aug 2023- Dec 2023

- Enhanced Porter Lee's Evidence Management System with REST APIs using the Delphi Framework.
- Improved data security with JWT-based authentication and authorization protocols.
- Increased system performance by 20% through SQL query optimization and caching.
- Facilitated seamless integration and understanding for developers by creating detailed API documentation using Swagger.

KAASHIV INFOTECH | Software Developer Intern | Chennai, Tamil Nadu

Jan 2021- July 2021

- Contributed to a responsive, cross-browser compatible, react web application, focusing on UI consistency and performance.
- Optimized the application state management, resulting in a **20%** increase in overall performance and user satisfaction.
- Utilized project management tools like Agile, Scrum, and JIRA and was able to troubleshoot problems on various projects.

PROJECTS

Hospital Portal | Java, Spring Boot, React JS, TypeScript, MySQL

Sep 2024

- Built a secure, high-performance React UI integrated with Spring microservices, enabling responsive, non-blocking data interactions for hospital workflows.

Hotel Booking System | React, Material UI, Redux, Tailwind CSS

Jan 2023

- Developed a responsive single-page application with optimized Redux state management to support real-time hotel search and booking with smooth user interactions.

AI Customer Support Automation Platform | Next.js, TypeScript, PostgreSQL, OpenAI

Dec 2022

- Built an AI-powered customer support system with RAG-based responses and Next.js Frontend, reducing reply time by ~80%.

EDUCATION

Master of Science in Computer Science- Wichita State University, Kansas

May 2023

Bachelor of Technology in Information Technology- Anna University, Chennai, India

May 2021

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- HackerRank Advanced SQL Certification
- Meta Front-End Developer Certification
- Machine Learning Specialization by Stanford University
